NSN 5925-01-480-2119

Circuit Breaker - Page 1 of 1 View Online at https://aerobasegroup.com/nsn/5925-01-480-2119 **Body Style:** Rectangular dimensional envelope **Overall Length:** 1.724 inches **Overall Height:** 1.890 inches **Overall Width:** 0.980 inches **End Application:** 18 inch astab mon Pole Quantity: **Mounting Facility Type And Quantity:** 2 clamp **Maximum Continuous Load Current Rating Per Pole:** 5.0 amperes ac all locations and 5.0 amperes dc all locations **Operating Voltage Type And Rating Per Pole In Volts:** 250.0 ac all locations and 50.0 dc all locations **Maximum Interrupting Capacity Current Type And Rating Per Pole In Amps:** 1500.0 ac all locations and 1000.0 dc all locations **Circuit Protection Type:** Overcurrent all locations **Trip Release Method:** Thermal all locations **Trip Release Characteristic:** Time delay all locations **Ultimate Trip Rating Of Continuous Current Rating Per Pole In Percent:** 135.0 all locations **Reset Method:** Manual Frequency In Hertz: 400.0 all locations **Terminal Type And Quantity:** 4 quick disconnect, female Shelf Life: N/a **Unit Of Measure: Demilitarization:**

No
