| Overall Length:                     |
|-------------------------------------|
| 3.500 inches                        |
| Mounting Configuration:             |
| Thd bushing mtd                     |
| <b>Component Type And Quantity:</b> |
| 1 switch and 1 resistor             |
| Fsc Application Data:               |
| Generator, sweep                    |
| Shelf Life:                         |
| N/a                                 |
| Unit Of Measure:                    |
|                                     |
| Demilitarization:                   |
| No                                  |
|                                     |
