General Description:

Number of sections in assembly 3, each section bcd 1-2-4-8 with complement and one common, positions 0 through 9, mounting style front snap-in, assembly type with end plates, termination type short, color matte black body, glossy black wheel with white characters, unsealed switching contacts, contact resistance 100 milliohms max. Initial, operating voltage 50 millivolts to 28 vdc or 120 vac, current switched 100 milliamps max., current continuous 1 amp max., insulation resistance 1000 megohms min., dielectric breakdown 500 vac between common terminal and any output at sea level, operating temperature minus 10.0 deg. Celsius to plus 65.0 deg. Celsius, body and wheel material abs plastic

Shelf Life:
