Overall Length:

14.000 inches

Overall Height:

13.000 inches

Overall Width:

13.000 inches

Basic Shape Style:

Rectangular or square

Operating Ac Frequency In Hertz:

60.0 single voltage

External Ac Operating Voltage In Volts:

115.0 single voltage

Phase:

Single

Special Features:

Selects 24 contiguous transducer slave signals from a cylindrical array of 72, and through a phasing network provides a combined signal output equivalent to that obtained from a planar array. Sequentially advances 24 slave aperture around array so that 360 degree scan is achieved 30 times per second. Interpolation between scanning steps is used to simulate smooth, continuous scanning action of mechanically rotating transducer. Provides two synchronizing signals to transmit position information to the detecting-ranging set, sonar an/sqs-26cx

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A32200
