Special Features:

Solid state single pole triple throw s-band switch with integral driver and logic control circuitry for shipboard phased array radar; switching time for input to output 5 microsecs; input voltage 5 vdc; rf input 10 mw maximum through 4 sma connectors; 19-pin power connector; aluminum alloy housing encloses removable components; o/a dims 3.8 in. Lg, 1.60 in. W, 1.38 in. H

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
