End Application:

Sa-2578/g switch analog matrix

Functional Description:

Sa-2578/g is.A programmable coaxial video relay switch matrix in a bi-directional quad 5x20 configuration, remotel controlled from a external computer or a interface unit

General Description:

11s vac; 50/60 hz; single phase; 67 watts; frequency range dc-20mhz; characteristic impedance 50 ohms; open circuit isolation less than -60 db @ 20mhz; contact rating 100 vdc, 0.25 amps, 10 watts; switching speed less than 1 ms; control i/o 16 bit parallel bus, ttl levels; 5.25 in height by 19 in width by 23.00 in depth; rack mounted

Shelf Life:

N/a
