End Application:

Fleet exercise system, torpedo mk50

Terminal Type:

Wire lead

Special Features:

Insulation resistance 100 megohmsmin with 500 +/- 50 vdc (current limited) potential between wires, and connector and wires, max allowable resistance per one circuit-0.200 ohms for 24awg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A052b0
