Body Length:

0.984 inches

Body Width:

1.299 inches

Body Height:

2.126 inches

Actuator Position-action Relationship:

Up position maintained and down position maintained

End Application:

7010-01-391-0168

Special Features:

Material: thermoplastic polyamide; 2 pole with thermal sensing; interrupting capacity: 300a; life: 25000 cycles at rated current; dielectric strength: 2000 vac; insulation resistance: 100 megaohm; operating temperature range: -30 cto + 60 c; shock resistance: 30 g; vibration resistance: 8 g; humidity: 95% at 40 degrees cel; contact style: .25 (2 x .1000); current rating: 10 a (250 vac); number of contacts: 4; interrupt cap: 60; internal resistance: .010 ohm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A053a0
