Average Life Measurement:

Not rated

End Application:

Lmd shore

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Operating Control Method:

Manual

Installation Design:

Portable

Circuit Construction Type:

Solid state

Special Features:

X db25 female connectors and 1 db25 female i/o port for 1 computer to access multi parallel or serial devices, or 1 parallel or serial device to be shared for multi computers; use straight through db25 male to male cables for connecting the computers paralel or serial ports to the switch with maxim length 6 meters for parallel application and 15 meters for serial application; fully shielded metal enclosure to protect data signals from radio and tv interference

Precious Material And Location:

Contacts gold

Precious Material:

Gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
