End Application:

Compressor, reciprocating. Breathing air compressor.

Special Features:

The complete part number is "no3925/asy". This is a temperature switch, normally closed which monitors the final valve head temperature on bauer compressors. It is set to 320 degrees fahrenheit and will close a circuit and shut off the compressor if the head exceeds this degree.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
