End Application:

Heating-air conditioning controls

Product Name:

Low pressure switch

Special Features:

Mounted on compressor suction line, designed to open if refrigerant pressure drops to 35 psig, it resets when the pressure rises to 60 psig, switch protects unit if airflow through the indoorblower is impeded, if blower motor fail, or if there is a loss of refrigerant

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A048b0
