**End Application:**

Naval expeditionary miscellaneous equipment

**Special Features:**

2.5mm plug. Similar to the bite switch except this is controlled by the tongue. The tongue switch works with even the tightest full-face headgear and chin cups, and requires no jaw movement or blowing. It is operated by a movement similar to pressing your tongue against the front teeth. It measure 23 inches long, switch body is 1/2 inch wide.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**
