Average Life Measurement:

Not rated

End Application:

741777 (53711) lan switch assembly.

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Module

Circuit Construction Type:

Solid state

Special Features:

The 6kp8-rj45 module supports ethernet twisted pair segments of any standard length. It is equipped with an eight-port rj-45 connector, and offers 10/100 full/half-duplex auto-negotiating capability on each port. The rj-45 connector is sheilded to minimize emissions and will allow both unsheilded twisted pair (utp) and sheilded twisted pai (stp) cable connections.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
