Special Features:

The prosafe fs108p provides power and data from a single point, using power over ethernet (poe) over a single cat-5 cable. The eight fast ethernet ports can be used for any 10/100 mbps link and four of these ports can supply industry-standard ieee 802.3af power. Advanced auto-sensing algorithm gives power only to 802.3af end devices, so no need to worry about damaging proprietary poe or non-poe equipment. In addition, it discontinues the power when poe devices are disconnected. Easy and reliable, the prosafe fs108p automatically determines poe requirements, speed, duplex, and cable type using auto uplink
