End Application:

Caterpillar mdl 815f2.

Special Features:

161-0022 switch, adjustable valid and procurable; descriptionon - switch as-adj. According to my service engineer, part 161-0022 is a switch-adjustable. It is a brake light switch used in a foot brake linkage on some machines to turn on the brake lights. It's basically a set of spring-loaded contacts in a bracket, that allows for a certain amount of adjustment.
