Product Name:

Global positioning/driver information systems, medical equipment rating: 5 vdc, 10ma, resistive, voltage breakdown: 250 vac between mutually insulated partsrotational life: 1, 000, 000 cuclees (one cycle is a rotation through all positions and a full return, power consumption: 150 mw for 5 vdc; 80 mw for 3.3 vdc

Special Features:

Ordering information 62series style a=1/2"package, 5.0 vdc

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A053a0
