| Unthreaded Mounting Hole Diameter:    |
|---------------------------------------|
| Between 0.121 inches and 0.123 inches |
| Mounting Facility Type And Quantity:  |
| 2 unthreaded hole                     |
| Material:                             |
| Brass                                 |
| Material:                             |
| Copper alloy                          |
| Surface Treatment:                    |
| Tin                                   |
| Surface Treatment:                    |
| Tin plated                            |
| Shelf Life:                           |
| N/a                                   |
| Unit Of Measure:                      |
|                                       |
| Demilitarization:                     |
| No                                    |
| Fiig:                                 |
| A10100                                |
