Overall Length:

19.000 inches

Overall Width:

3.500 inches

End Application:

Afscn ecp 134 (57402)

Component Quantity:

16

Usage Design:

Interface between data terminal equipment and data circuit-terminating equipment employing serial binary data exchange

Mounting Configuration:

Sixteen male to female adapters mounted on panel 19.00 inches long by 3.50 inches wide

Component Controlling Agency:

Loral space and range systems

Component Name:

Panel, patching

Component Identifying Number:

A023011-01 drawing no.

Mounting Method:

Panel

Special Features:

Adapters installed on panel which is rack mountable per eia rs-310

Special Test Features:

Eia/tia-232 and ul1863

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T389-b
