Overall Length:

2.200 inches

Overall Width:

0.900 inches

Unthreaded Mounting Hole Diameter:

0.160 inches

Mating End Quantity:

2

Connector Locking Method:

Lock tab

End Application:

Automated surface observing system (asos)

Special Features:

Adapter shall be a filter/surge suppressor to perform emi and surge protection on telephone signals. The filter/suppressor shall operate with normal switched telephone signal levels. It must pass the ac ring voltage of approximately 170 vac as well as audio up to 4khz. There shall be 4 pins on each filter. All 4 pins shall be filtered and protected for surge. Surge protection shall be shunted to case ground. Current rating - load current 0.5 amperes per pin; operating voltage - 200 vac; dc resistance - 0.2 ohms or less. The input end of the housing shall have a rj-11 socket telephone connector and a mounting flange. The flange shall have two 4-40 screw inserts. The output end shall have a rj-11 connector. The pins shall be wired pin to pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
