End Application:

Fy92arc/amc (98897)

Component Quantity:

3

Usage Design:

Used on an electrostatic winch

Mounting Configuration:

Two electrical switches attached to a elec connector via wiring harness

Component Controlling Agency:

Able corp

Component Name:

Connector assembly

Component Identifying Number:

28555 drawing no.

Mounting Method:

Plug-in

Special Features:

The connector is identified as a ms3102a16s-18p and the switches are

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
