Electrical Receptacle Connector - Page 1 of 2

View Online at https://aerobasegroup.com/nsn/5935-01-464-1076

Body Style:
Right angle type
Overall Length:
4.080 inches
Overall Height:
0.375 inches
Overall Width:
0.745 inches
Unthreaded Mounting Hole Diameter:
3.750 inches
Distance Between Mounting Facility Centers:
0.096 inches
Mating End Quantity:
1
Contact Position Arrangement Style:
3 rows of contacts non-inserted board single mating end
Contact Removability:
Nonremovable single mating end single contact grouping
Contact Maximum Current Rating In Amps:
3.0 single mating end single contact grouping
Connector Locking Method:
Friction
-
Friction
Friction End Application:
Friction End Application: F15a
Friction End Application: F15a Terminal Location:
Friction End Application: F15a Terminal Location: Side single mating end single contact grouping
Friction End Application: F15a Terminal Location: Side single mating end single contact grouping Contact Material:
Friction End Application: F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping
Friction End Application: F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment:
Friction End Application: F15a F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end
Friction End Application: F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material:
Friction End Application: F15a F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end
Friction End Application: F15a F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end Terminal Type:
Friction End Application: F15a F15a Cerminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end Terminal Type: Pin single mating end single contact grouping
Friction End Application: F15a F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end Terminal Type: Pin single mating end single contact grouping
Friction End Application: F15a F15a Cerminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Included Contact Quantity: 102 single mating end single contact grouping
Friction End Application: F15a F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end Ferminal Type: Pin single mating end single contact grouping Included Contact Quantity: 102 single mating end single contact grouping
Friction End Application: F15a F15a Terminal Location: Side single mating end single contact grouping Contact Material: Copper alloy single mating end single contact grouping Contact Surface Treatment: Gold single mating end single contact grouping and nickel single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single mating end Insert Material: Plastic polyester glass filled single contact grouping Plastic polyester glass filled single polyester glass filled single polyester glass filled

single contact grouping
