Overall Length:

18.000 inches

Component Quantity:

3

Mounting Configuration:

An internally threaded coupling ring at both ends

Component Controlling Agency:

Glenair

Component Name:

Conduit assembly

Mounting Method:

Connector

Special Features:

Backshells are connected by .77 inch o.D. Conduit

Supplementary Features:

Backshells are aluminum alloy with cadmium plate and olive drab chromate over electroless nickel and are 500 hours salt spray resistant.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T389-b
