Overall Length:

8.300 inches

Overall Height:

12.800 inches

Overall Width:

1.100 inches

Special Features:

2 amps current rating; black insulation color; ul 94v-0 insulation flammability rating; glass filled polyester insulation material; header, rectangular plug interface style; minus 55 to plus 105 degree celsius non operating temperature; 2 contact rows; 20 contacts; 4 walls; military and center bump polarization; 0.155 inch tail length; solder tailtermination method; printed circuit board termination style; 1000 vrms withstanding voltage at sea level

Precious Material:

Gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T389-b
