Overall Length:

1.310 inches

Operating Temperature Range:

-55.0/+125.0 degrees celsius

Current Rating In Amps:

10.0

Terminal Design:

Feedthru

Special Features:

Polyetherimide body; green per dac approval; contacts and retention clips are single piece beryllium copper; wire seal grommet is silicone rubber 35-55 shore a hardness; radius or fillet all edges and corners on the foot and foot transition .035r; bussed contacts shall be of a construction such that variations in mechanical assembly processes do not affect electrical continuity, solder shall not be used; the contact clip retention spring and bus assembly shall be gold plated

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510r0
