Overall Length:

1.065 inches

Maximum Conductor Size Accommodated:

22 awg

Electrical Insulation Feature:

Insulating sleeve

Identification Code Color:

Red

End Application:

System improvement plan (sip) 4, modification work order (mwo) 5-2350-262-35-3 to m9 ace vehicles.

Basic Shape Style:

Sealing sleeve

Conductor Accommodation Type:

Recessed barrel all ends

Product Name:

Butt splice

Special Features:

UI and csa rated for 600v maximum (1000v fixture of sign) and 90 degrees c.

Material:

Copper conductor accommodation

Surface Treatment:

Tin conductor accommodation single layer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A006b0
