Block Type:

Thermal

Voltage Rating:

150.0 volts

Special Features:

Extends input range of scxi-1125 module to 150 (rms) or 150 vdc on per-channel basis through software commands; includes onboard temperature sensor for thermocouples cold-junction compensation; attaches directly to front of scxi-1125 module

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510r0
