Current Rating In Amps:

24.0

Voltage Rating:

24.0 volts

Wire Size Accommodated:

Between 12.0 awg and 30.0 awg

Product Name:

Terminal block

Special Features:

Description: two circuit blocks consisting of a series resistor/capacitor connected in parallel with metal oxide varistor (mov). This device will suppress transient voltages developed by relay, contactor, and solenoid coils

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A510r0
