Overall Length:

1.10 inches

Thru-hole Diameter:

0.085 inches

Maximum Conductor Size Accommodated:

20 awg

Largest Diameter:

0.085 inches all ends

Electrical Insulation Feature:

Heat shrinkable sleeve

Identification Code Color:

Red

End Application:

Ah-1w

Basic Shape Style:

Sealing sleeve

Conductor Accommodation Type Style:

Recessed barrel all ends

Special Features:

Is for permanent splicing and is environmental resistant

Material:

Plastic polyvinylidene fluoride insulation

Surface Treatment:

Tin except insulation single layer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A006b0
