**Special Features:**

Input voltage 24v dc, with internal dpdt 10amp 28v dc relay, release and recycle time 125 milliseconds typical 225 milliseconds max, with polarity protection, plastic case with mtg bracket, external resistor not included used for time delay adjustment on operate, 1-4 watt resistor of 2 megohm required for maximum time delay, time delay 1-120 sec

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A513k0
