| Overall Length:                                 |
|---|
| 3.500 inches                                    |
| Overall Height:                                 |
| 2.563 inches                                    |
| Overall Width:                                  |
| 3.250 inches                                    |
| Frequency In Hertz:                             |
| 400.0   |
| Duty Type:                                      |
| Continuous                                      |
| Special Features:                               |
| As differentiated by the source control dwg no. |
| Shelf Life:                                     |
| N/a   |
| Unit Of Measure:                                |
|   |
| Demilitarization:                               |
| No  |
| Fiig:   |
| A03300  |
|   |
