End Application:

Used on ship service switch board onboard 140 ft wtgb cg vessels

Special Features:

Fline voltage-120 vac single phase or 120/208 vac three phase; line freq.50-400 hz.; drop-out point-85 to 120 vac screwdriver adjust.; pick-up to drop out differential-3 volts max.; temperature range-minus 55 deg. To plus 85 deg. C.; temp. Drift-plus or minus 2 volts from minus 55 deg. To plus 85 deg. C; type sensing-average-3 phase; contacts-spdt; contact rating-5amp resistive at 28 vdc or 120 vac; power consump. 2 va max. Min. Life-500.000 operations
