**Contact Arrangement:**

Single pole, double throw

**Features Provided:**

Transistor driven and hermetically sealed and vibration resistant

**Criticality Code Justification:**

Feat

**Special Features:**

Electromechanical output; diode coil suppression; contacts 1 amp at 28 vdc resistive; supply voltage 18vdc; coil resistance 1130 ohms; failure rate 1.0 pct; low level to 1 amp; 0.275/0.335 in. Dia; 0.280 in. Maximum lg; 8 wire terminals; contact load lamp rating 100 ma; thermal shockproof; test data document a81349-mil-r-28776

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A51310

**Mil-std (military Standard):**

Mil-prf-28776 spec.
