**Special Features:**

Used as a reverse power relay on ships service generators; designed for use on 50.0, 60.0 or 400.0 hertz systems; 3 phase; voltages 100-110-133/190-200-240/380-400-415/500/120-139/208-240/416-450-480/600 vac plus or minus 10 percent; voltage burden 10 va per phase; continuous current 6.0 amperes; output spdt relay contact rating 10.0 amperes at 120.0 vac; operating temperature minus 40.0 degrees f to plus 158.0 degrees f; enclosure type encased; 8.000 in. Lg; 4.250 in. W; 4.750 in. H

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A513k0
