End Application:

6740-01-193-7018printer-process

Special Features:

10.0 amps; 3.8 to 28.0 volts dc input and 25.0 to 240.0 volts ac output; zero voltage turn-on; optically isolated; fire-resistant design; dimensions: length 2.230 min and 2.270 maximum inches; width 1.730 min and 1.770 maximum inches; height 0.977 maximum inches; 4 quick connect terminals are nickel-plated brass; double-sided circuit board; constant current input; 50/60 hz; 16 a triac; output triac is clamped to the baseplate using a spring clamp; ttl compatible input; finished relays are pre-conditioned at 80.0 degrees c; yellow color-coded case; monolithic driver

Shelf Life:

N/a
