Overall Length:

2.380 inches

Overall Height:

3.625 inches

Overall Width:

1.750 inches

End Application:

Propeller rpm indicator circuit located in main propulsion control switchboard, p/n d-82-3008-3cg-01, onboard 180 ft wlb coast guard vessels

Voltage Rating:

12.0 volts control

Special Features:

Unit accepts quadrature input signals and decodes them into two forms of output signals; delivers output count pulses in 1 to 1 relationship with quadrature pulses

Terminal Type And Quantity:

12 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A513k0
