**End Application:**

Softwarelevel

**Special Features:**

3 spdt; input voltage: 115.0 vac with a 10.0 amp load resistance and 6.0 amp load inductive; power dissipation of 7.0 watts; 3 phase; 60 hertz; dimensions: length 5.365 in. Min and 5.385 in. Max, width 3.720 in. Min and 3.780 in. Max, height 2.720 in. Min and 2.780 in. Max; mounted by 4 unthreaded holes with a diameter of 0.156 in. Nom spaced 2.750 in. Nom apart parallel to width and spaced 4.875 in. Apart parallel to length

**Reference Number Differentiating Characteristics:**

As differentiated by extra long reference number

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A513k0
