End Application:

Softwarelevel

Special Features:

3 spdt; input voltage: 115.0 vac with a 10.0 amp load resistance and 6.0 amp load inductive; power dissipation of 7.0 watts; 3 phase; 60 hertz; dimensions: length 5.365 in. Min and 5.385 in. Max, width 3.720 in. Min and 3.780 in. Max, height 2.720 in. Min and 2.780 in. Max; mounted by 4 unthreaded holes with a diameter of 0.156 in. Nom spaced 2.750 in. Nom apart parallel to width and spaced 4.875 in. Apart parallel to length

Reference Number Differentiating Characteristics:

As differentiated by extra long reference number

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
