| Overall Length:                    |
|------------------------------------|
| 1.780 inches                       |
| End Application:                   |
| Used on m1a2 tank                  |
| Winding Quantity:                  |
| 1                                  |
| Coil Quantity:                     |
| 1                                  |
| Duty Type:                         |
| Continuous                         |
| Special Features:                  |
| Electrostatic sensitive            |
| Nuclear Hardness Critical Feature: |
| Hardened                           |
| Terminal Type And Quantity:        |
| 9 pin all functions                |
| Shelf Life:                        |
| N/a                                |
| Unit Of Measure:                   |
|                                    |
| Demilitarization:                  |
| No                                 |
| Fiig:                              |
| A03300                             |
