Overall Length:

3.500 inches

Overall Height:

4.800 inches

Overall Width:

2.200 inches

Operating Temperature Range:

-40.0/+131.0 degrees fahrenheit

End Application:

Controller d700g003 onboard 420 ft wagb coast guard vessels

Voltage Rating:

190.0 volts input and 500.0 volts input

Contact Arrangement:

Double pole, double throw, three positions maintained

Special Features:

6reverse phase relay; frequency 50 to 60 hz; power consumption 2w per phase; transient protection 2500 vrms for 10 msec; repeat accuracy plus or minus 0.1% (fixed conditions); response time 0.05 seconds; reset time 0.05 seconds; reset type automatic; dead band approximately 2%; output contacts spdt 10a at 240 vac; expected relay life mechanical 10 million operations - electrical 100,000 at rated load; humidity tolerance 0-97% w/o condensation; case material abs plastic; surface mounted; weight 7 oz

Terminal Type And Quantity:

6 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A513I0
