Operating Temperature Range:

-30.0/+80.0 degrees celsius

Voltage Rating:

48.0 volts operate and 280.0 volts operate

Current Rating:

120.00 amperes surge

Time Delay:

16.60 milliseconds switching

Special Features:

Nmax on state voltage drop rated current 1.6 vdc; maximum off state leakage current at rated voltage 10.0 marms; maximum turn off time one half cycle; maximum reset time 100 usec; power factor min with maximum load 0.5; dielectric strength input section output base 4000 vrms; insulation resistance at 500 vdc 10; ambient storage temperature range m40.0 c p125.0 c; encapsulation thermally conductive epoxy; typical weight 3.0 oz; terminals screws and saddle clamps furnished, unmounted

Terminal Type And Quantity:

2 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A513k0
