Operating Temperature Range:

-40.0/+85.0 degrees celsius

End Application:

Control/display subsys, sdvmk8 mod 1 (new build)

Voltage Rating:

20.0 volts operate

Current Rating:

3.00 milliamperes control

Time Delay:

5.00 milliseconds turn-on

Special Features:

Ideally suited for switching high currents or low level signals without distortion or injection of electrical noise; package with either thru-hole or surface mount (gull-wing) terminals

Terminal Type And Quantity:

6 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A513k0
