Operating Tempurature Range:
40.0/+85.0 degrees celsius
End Application:
Control/display subsys, sdvmk8 mod 1 (new build)
Voltage Rating:
20.0 volts operate
Current Rating:
3.00 milliamperes control
Time Delay:
5.00 milliseconds turn-on
Special Features:
deally suited for switching high currents or low level signals without distortion or injection of electrical noise; package with either thru-hole or
surface mount (gull-wing) terminals
Terminal Type And Quantity:
5 pin
Shelf Life:
N/a
Unit Of Measure:
-
Demilitarization:
No
Filg:
A513k0
