**Operating Temperature Range:**

-40.0/+85.0 degrees celsius

**End Application:**

Control/display subsys, sdvmk8 mod 1 (new build)

**Voltage Rating:**

20.0 volts operate

**Current Rating:**

3.00 milliamperes control

**Time Delay:**

5.00 milliseconds turn-on

**Special Features:**

Ideally suited for switching high currents or low level signals without distortion or injection of electrical noise; package with either thru-hole or surface mount (gull-wing) terminals

**Terminal Type And Quantity:**

6 pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A513k0
