**Motor Voltage Type And Rating In Volts:**

24.0 dc

**Special Features:**

Coil resistance: 384 ohms; power consumption: 1, 5 w; contact material: silver alloy; initial operating time: 10ms max.; operating temperature -40 to +85 degrees celcius; weight: 18, 5g approximate

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A519n0
