Motor Voltage Type And Rating In Volts:

24.0 dc

Special Features:

Coil resistance: 384 ohms; power consumption: 1, 5 w; contact material: silver alloy; initial operating time: 10ms max.; operating temperature -40 to +85 degrees celcius; weight: 18, 5g approximate

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A519n0
