End Application:

Light emitting diode precision approach path ind. (led papi)

Special Features:

Operating voltage 24-280 vac; 25 amps; panel mount; humidity type 85 percent non-condensing; led input status indicator, green; baseplate material, aluminum; ambient operating temperature range (7), -40 to 80 degrees c; ambient storage temperature range, -140-125 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
