Reliability Indicator:

Not established

Overall Length:

1.125 inches

Overall Height:

0.610 inches

Overall Width:

0.781 inches

Input-output Phase Relationship:

Single phase to single phase single component

End Application:

Transient current detector 66660-507-31

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 2 secondary single component

Terminal Type And Quantity:

9 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
