Reliability Indicator:

Not established

Input-output Phase Relationship:

Single phase to single phase single component

Winding Shielding Method:

Core grounded single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 1 secondary single component

Terminal Type And Quantity:

5 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
