-	al Quantity (non-core):
2	
Reliability Indic	ator:
Not established	
	er Distance Between Mounting Facilities Parallel To Length
	ngle mounting facility single center group
	er Distance Between Mounting Facilities Parallel To Width:
	gle mounting facility single center group
Frequency Rati	-
57.0 hertz and	63.0 hertz single component
Input-output Ph	ase Relationship:
Single phase to	single phase single component
Winding Shield	ing Method:
Internal shield gr	ounded to inclosure single component
Body Length:	
5.875 inches	
Body Width:	
4.750 inches	
Body Height:	
7.750 inches	
Inclosure Type:	
Hermetically sea	led
Mounting Facili	ty Quantity:
4 single group	
Mounting Metho	od:
Flange and unth	readed hole single group
Winding Function	on And Quantity:
1 primary and 2	secondary single component
Winding Operat	ing Current:
707.0 milliamper	es ac single component 1st secondary
Winding Operat	ing Voltage:
638.00 ac volts	single component 1st secondary
Terminal Type /	And Quantity:
9 standoff insula	-
Shelf Life:	
N/a	
Unit Of Measure	2:
Demilitarization	:
No	
Fiig:	
A058b0
