Reliability Indicator:

Not established

Input-output Phase Relationship:

Single phase to single phase single component

Body Outside Diameter:

1.768 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

2 primary and 2 secondary single component

Terminal Type And Quantity:

4 solderless lug and 6 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
